Login Signup

Status

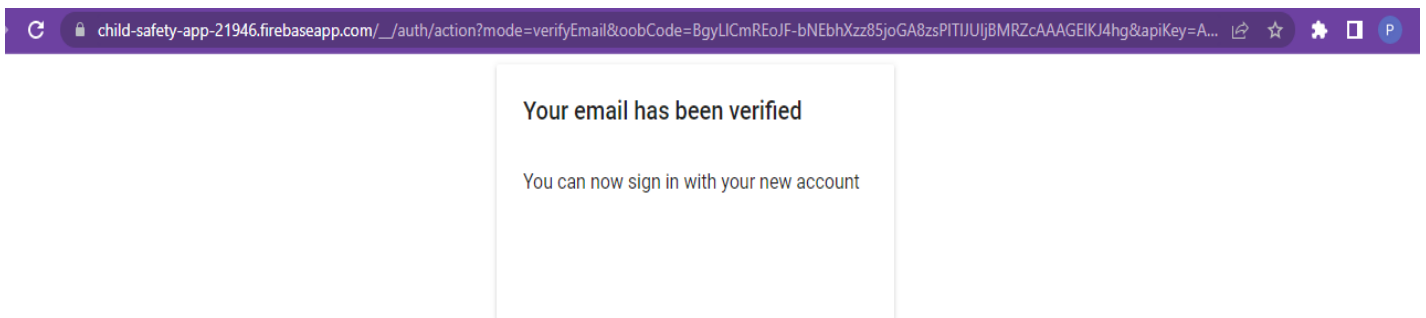

Once you sign up with your email id you will get the token and your information of mail will be stored in Firebase.

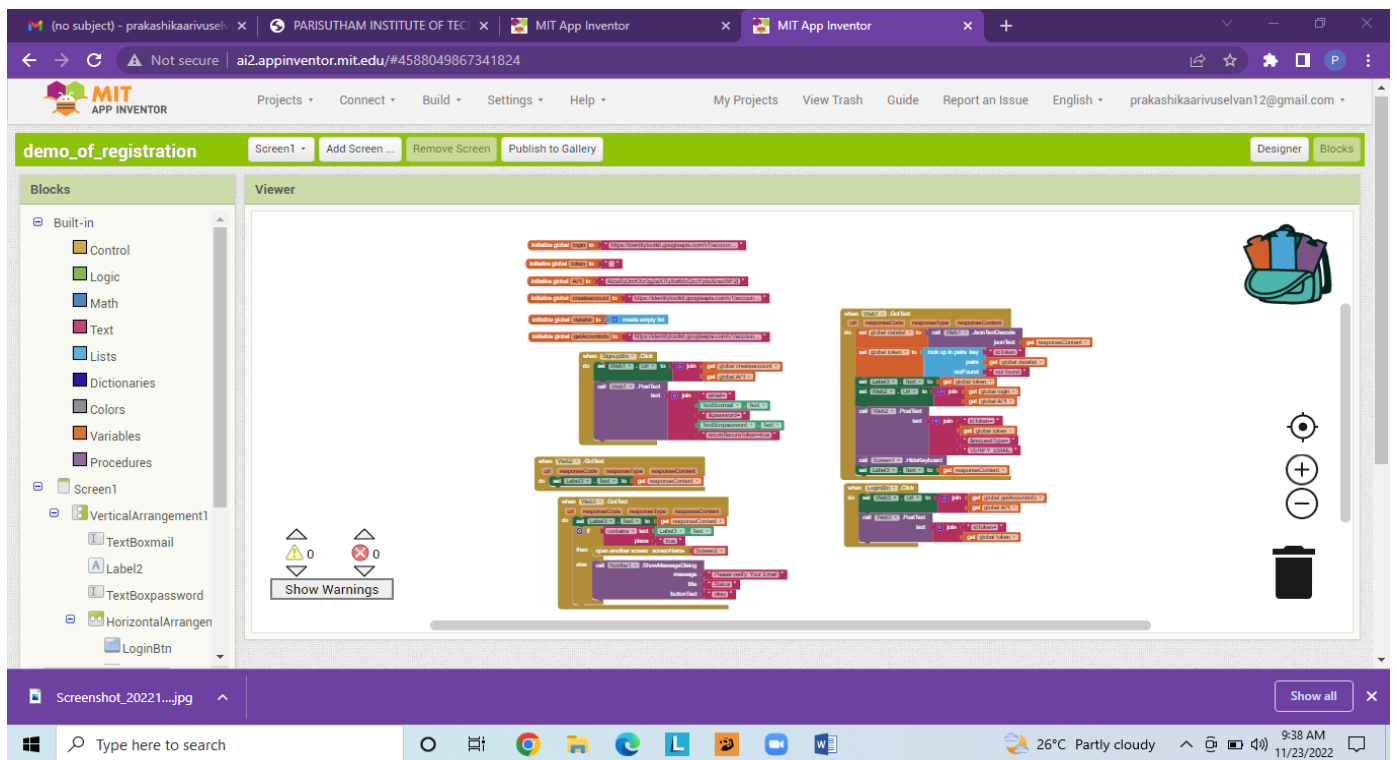

In firebase you will get the confirmation of your email id which is been sign up.

Here the picture of the verified pop up message.

At last when you login with the email id which is verified, you are directed to the screen 2.

These are blocks which is been designed for screen 1 to proceed its job clearly.

Blocks are the key components for all the app designer.
